Professional Summary

Senior Web Developer with 9+ years of experience delivering accessible, high-performance web solutions. Expert in WordPress, PHP, JavaScript, REST API integrations, and ADA/WCAG compliance. Trusted client-facing technical lead managing 220+ websites, coordinating third-party vendors, and partnering with executives to deliver secure, scalable production systems.

Work Experience

Senior Web Developer (Client-Facing)

Oct 2024 – Present

BIS Consultants | Farmers Branch, TX

- Serve as primary **client-facing technical contact**, gathering requirements, troubleshooting issues, and delivering solutions
- Manage development, maintenance, security, and accessibility compliance for **220+ client websites**
- Lead **ADA/WCAG remediation**, implementing semantic HTML, ARIA attributes, contrast fixes, and keyboard navigation
- Build **custom PHP and WordPress solutions**, including secure REST API integrations (Nemo-Q) for real-time data display
- Act as contact with **third-party vendors** (SEO agencies, hosting providers, accessibility platforms including UserWay)
- Collaborate cross-functionally with **Sales, Product, IT, and Executive teams** to translate requirements into technical solutions
- Resolve performance, spam, and security issues while prioritizing production-critical work independently

Front-End Web Developer

May 2015 – Aug 2024

VitalStorm | Rockwall, TX

- Converted designs from Adobe XD into fully custom WordPress themes website.
- Optimized websites performance, achieving a 50% performance boost and a 30% reduction in bounce rate, leading to a 15% increase in conversions.
- Developed and maintained SEO landing pages for internet marketing campaigns (Google Ads, Facebook Ads).
- Collaborated with cross-functional teams to ensure seamless integration of front-end and back-end components.
- Reduced load times by optimizing images, minifying code, and implementing caching, resulting in a smoother user experience.
- Retrofitted previous client websites with updated designs and functionalities using HTML, CSS, JavaScript, & PHP.
- Implemented SEO best practices, resulting in enhanced search engine visibility.
- Set up Google Tag Manager for advanced third-party script handling and special inputs.
- Custom build and maintain PPC SEO (search engine optimization) landing pages for internet marketing, Google Ads, Facebook Ads utilizing HTML, CSS, JavaScript, Gatsby.js & Sanity.io.
- Manage and maintain over 20 client websites using ManageWP, ensuring seamless functionality by regularly updating plugins, themes, core files, and implementing security measures while optimizing for SEO to improve site performance and rankings.

- Assembled and addressed technical and design requirements, integrating user-facing and front-end elements to maintain web presence effectiveness.
- Improved website user experience by redesigning the interface and optimizing navigation, produced websites compatible with multiple browsers.
- Helped the company streamline WordPress website builds by implementing plugins such as ACF (Advance Custom Fields) for custom field input.
